5) the HSCD homepage Current Events section. just points to what I would think would be the main page as I see it.

In the future when we go through the One EPA conversion we just will have one page for each site. Instead of having this multiple page broken up stuff.

The new Dimock page should be consider the Main page for the site now that is how it works with other Superfund/Cleanup site pages. Stuff under EPA.GOV is considered official as far as the EPA web community is concern.

The other can of worms is the OSC site in general. I don't know why I am not given the documents to put up on our page if that is what they want to do. Im sure at the time the OSC page was created this was not as easy to do but now you are paying a full time contractor just to work on HSCD's content so us me and my knowledge and understanding of the web.

I kinda feel the previous pr pages should be listed on our new page along with any fact sheets, etc we have about the site. Why make people have to go to all of these different sites.

Question I ask then is Why did we even create this latest page just to put the FTP links on the OSC page could of linked to new ftp Raw data stuff just as easily.

One final thing is Paul and I have been trying to figure out how to get this new page listed first on google. The problem is we have too many pages on Dimock. The PA site should just link to our main page since we have one now and any information the PA page has that not on are main page should be moved too it. We are fighting with ourselves for popularity on google! and confusing the public at the same time.

I hope no one took any offense to any of this and I would be happy to dicuss this further in person if my ideas were not clear here. That is just my two cents. :)

Thanks,

**Subject:** Re: Dimock Press Release

Per our conversation, I would recommend that we post an electronic copy of the Press Release on the www.epaosc.net website, since previous PRs are already there, and I would suggest leaving the Electronic Reading Room for FOIA-related documents.

I'm saying this because there are 5 online locations for info on the Site that I know about: 1) the epaosc site, 2) the HQs About PA site, 3) the ARweb site, 4) the Electronic Reading Room site, and 5) the HSCD homepage Current Events section.

In keeping with the purpose / function for each location, the 'reading room' website should be FOIA docs. We should be organizing these sites' contents to its intended purpose. I can see where it would be very easy to start uploading all docs to all sites. I think this may actually add to the confusion. I like the idea of keep these sites in their own lanes, so to speak.

My 2 cents. :}

Charlie: A question for Helen or Trish to decide.

Helen/Trish: Please see Charlie's question below.

Thanks,

Paul

Subject: Dimock Press Release

Should our new Dimock page link to this press release?
